

PROJECT FILE

Wastewater Solutions

Client	NSW Shire Council
Location	Livestock Saleyard
Effluent Management Process	Truck Wash with solids trap, alternating effluent ponds and final irrigation pond.
Sales	Every Monday, Tuesday, second Friday and one Thursday per month.
Issues	Sludge build-up and water quality
Works installed	Install For Earth Aeration system with manual bacteria dosing.
Install Date	03/08/11
Description	Effluent is collected from the truck wash. It passes through a solids trap that removes some of the solids before gravity feeding to the effluent ponds. The aeration system has been installed into both ponds. This has provided ongoing sludge reduction and improved water quality for irrigation.
