

PROJECT FILE

Wastewater Solutions

Client	NSW Shire Council
Location	Regional Saleyards, NSW.
Effluent Management Process	Truck Wash with solids trap and effluent ponds before discharging to STP maturation ponds.
Sales	Every Tuesday.
Issues	Sludge build-up and water quality.
Works installed	Install For Earth Aeration system with manual bacteria dosing.
Install Date	03/08/08
Description	Effluent is collected from the truck wash. It passes through a solids trap that removes some of the solids before gravity feeding to the effluent ponds. The aeration system has been installed into the first pond. This pond is manually dosed with For Earth Bio©. This has provided ongoing biological sludge reduction and improved water quality.
