

PROJECT FILE

Wastewater Solutions

Client	NSW Shire Council
Location	Regional NSW.
Effluent Management Process	Truck Wash with effluent ponds, then irrigation.
Sales	Twice a month
Issues	Sludge build-up and water quality.
Works installed	Install For Earth Aeration system with manual bacteria dosing.
Install Date	14/07/08
Description	Effluent is gravity fed from the truck wash to the effluent ponds. The aeration system has been installed into the first pond. This pond is manually dosed with For Earth Bio™. This has provided ongoing biological sludge reduction and improved water quality for irrigation.
