

# PROJECT FILE

## Wastewater Solutions

<b>Client</b>	<b>NSW Shire Council</b>
Ref	NSWK03
Sewage Treatment Process	Oxidation Ponds - since 1991
Est daily flow (DWF)	350,000L
Population	1400
Issues	Sludge Build up in ponds / algae blooms / water quality
Works installed	Installation of For Earth probiotic dosing and low energy aeration system
Install Date	20/01/2014
Description	Ponds 1 and 2 had significant sludge build up and Council required an environmental and more economical solution than centrifuge and landfill disposal. The For Earth system provided biological sludge reduction and long term treatment results. ( Project data available on request)
